

## NOVEMBER RAINFALL & TEMPERATURE DATA

Rainfall for month:	2.80 in.
Rainfall year-to-date:	63.34 in.
23 yr. monthly rainfall average:	2.00 in.
Average high temperature:	81.9 F (normal: 79.0 F)
Above normal temperature days:	23
Record high temperature days:	5

# A DAY TO Remember When

## MEADOW'S WEATHER/HURRICANE ANALYSIS: NOVEMBER 2022 REPORT

Roy Wysnewski — Meadow's Weather/Climate/Hurricane Analysis

### WEATHER SUMMARY

For those of us who are north country "transplants," November 20th was a time to pause and **remember when** this day's high temperature (63 degrees F) was just one of many typical Fall temperature days!

Despite a four-day cool spell in mid-month, the monthly average temperature was above normal and record high temperatures were recorded on three of the last six days. Rainfall also was above normal in November.

### TEMPERATURE ANALYSIS

Following a cooler than normal October, November temperatures exceeded normal by nearly three degrees F. Other statistics for the month include twenty-three above-normal temperature days and five record high-temperature days!

### RAINFALL ANALYSIS

November rainfall exceeded the monthly norm by 40%. The year-to-date total (63.34") exceeds our expected end-of-the year twelve-month average (51.6) by 123% – with one month to go!

Monthly temperature and rainfall data are presented in the graph.

### 2022 HURRICANE SEASON SUMMARY

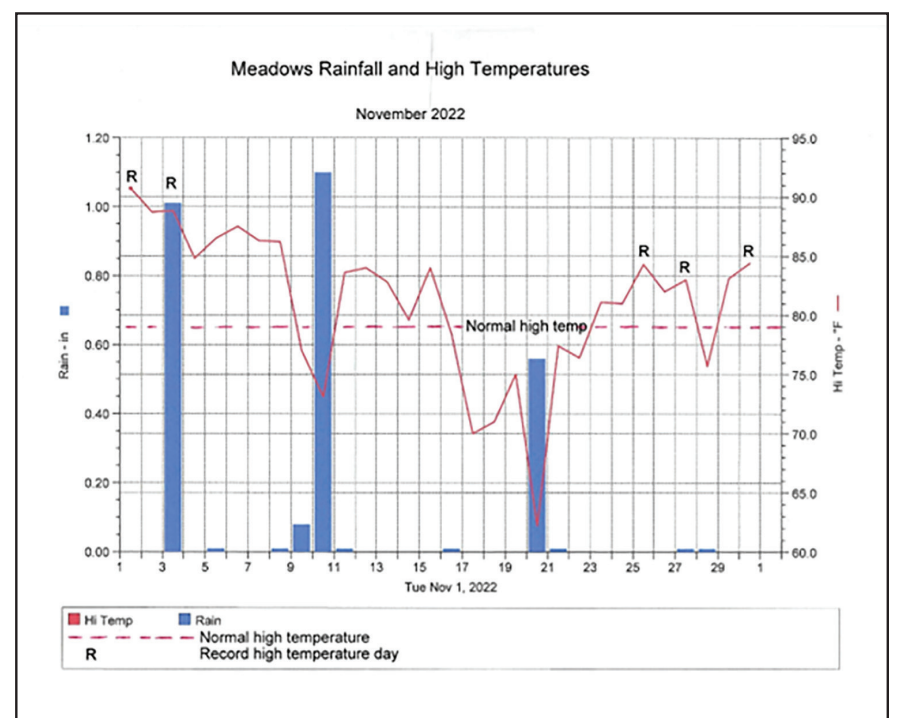

This was a very unusual hurricane season! There were no hurricanes and only three tropical storms during the first three months. Then, in September the dam burst and two tropical storms and four hurricanes ranging from category 1 (Danielle) to category 4 (Fiona and Ian) developed in the Atlantic basin.

October and November completed a very busy second half of the season as there were two named tropical depressions, one tropical storm, and four category 1 hurricanes.

The Meadows once again escaped any major hurricane damage! However, on September 28th Hurricane Ian delivered significant rainfall and sustained tropical storm winds for several hours with an occasional gust to hurricane category 1 level. Hurricane Nicole visited on November 10th bringing slightly more than an inch of rain and brief periods of tropical storm winds.

The table below provides a comparison between predicted vs. actual storms for the 2022 hurricane season.

## FitMinds

Life Changing Mental Stimulation

*Presented by Cindy Black & Wendy Mills*

Visit us at the Meadows Health Fair on January 5 2023

FitMinds provides mental stimulation for seniors in groups, in individualized programs. Its curriculum exercises 5 key areas of cognition; language and music, visual and spatial orientation, memory, critical thinking and computation. This presentation will include a typical FitMinds session. You will learn the following:

- ✓ What is FitMinds?
- ✓ What are examples of the key 5 areas of cognition?
- ✓ What happens if you don't stimulate your brain?
- ✓ What is a typical FitMinds session like?
